

Item specs for 2D Clothing

- For this challenge, you must **submit two R15 dummies wearing two complete outfits created by you**. Each complete outfit consists of 2 parts: shirt and pants. You can find clothing [templates and how to upload to Roblox on DevHub](#). We also have a quick tutorial on how to fit your creations in the dummies at the end of this document.
- The file format must be in RBXM or RBXL.
- The challenge theme is **1960s-1980s decades**. You can choose any decade from this time frame to inspire your creations. Here is a few things we **suggest** for each era, but feel free to use your creativity:
 - 1960s: Bell bottoms, colorful and paisley prints, peace, hippie, or rock'n roll inspired
 - 1970s: colorful outfits, t-shirts popularized, flowers, rainbow, and leather jacket
 - 1980s: oversized clothing, neon colors, big accessories

You can choose a different decade for each outfit.

- After reading **all directions carefully**. Please, submit your entry through this [link](#). Make sure the format follows the guidelines shown in the first, second, and third topic, otherwise your entry will be disqualified. Any inappropriate asset **will not be** tolerated.
- Remember to take pictures of your creation process to submit them in the submission form. Additionally, **you do not need to upload your creations to the catalog**, you will only need to upload as an image to fit into your dummies. **We will be looking at the most realistic submissions!**

How to dress your dummies

- Upload the clothing templates on Roblox as decals (images) on the [Create](#) page or [learn more](#) about uploading as Game Assets on Roblox Studio (both ways work). Save the asset links or IDs for later.
- In Studio, open the Plugins tab and click Build Rig.

- Choose any R15 rig from the popup menu. This should drop a “Dummy” avatar in your workspace.
- In the Explorer window, hover over the Dummy, click the “+” button, and insert either a Shirt or Pants object according to your clothing type.

- Locate and select the new `Shirt` or `Pants` object inside the dummy.

- In the Properties window, locate the property `ShirtTemplate` or `PantsTemplate`.

- Click inside the property’s row and select the image or paste the asset link of the [template](#) that you uploaded to Roblox. This should apply the clothing to the dummy avatar!
- Now save the two dummies with the outfit as RBXM or RBXL and submit them in the survey.
